How do digital ID systems empower individuals AND NATIONS for inclusive access to services and economic empowerment?

Developing States

10x in 100 days

Digital States

Cross-border Identity
Inclusive Access to Services
Increased Security and Privacy
Augment Government Serving Capacity
Entrepreneurship and Economic Participation
International Interoperability
Ecosystem of Digital Trust
Biodiversity Preservation
Climate Change Bonds

One-time users and documents solve most of interoperability and bureaucratic problems — *costs in trust*
